

OPS Coordination call

1800 09.06.2017

Flint Hills Resources – check on field debris and waste degradation

- Can they perform open burn?
- Forwarded to TCEQ
- Reported in NRC report (pending)
- A judge within the area was unaware that EPA was at the FHR site

Alpha - Field personnel experienced a broken spring on a trailer (changed operational plan for the day)

- 1,000 poly tank (primary focus)
- Afterwards, will switch over to a haz. evaluation boat

Bravo

- 16 counties in Bravo
- 25 haz. Eval. teams out
- 57 target
 - o 100% complete in Liberty, Austin, Waller, Chambers
 - o 90% complete in Montgomery, Walker and Colorado

Air Recon flight was out

Discharge assessment teams out (plotting locations for staging areas)

Water teams were out, but did not provide numbers

No CICs checked in today.

Flew over 4 NPL sites

- Highlands Acid pit
- French Limited pit
- **Add two more sites**

Would like to pursue FOB tomorrow 9/7

USCG – oil spill in Houston (Orange County)?

- Debris hung up in tree
 - o Visible stains were noted
 - o Does not appear to be a direct threat

Started electronic check in: CRC, finance, water

Safety

Haz issues for Bravo and Charlie – need evacuation plan, medical plans (206s and 204s: add into attachments)

Concerns: safety and safety hazards with water ops

Working on the criteria for clearing counties

- Not picking up empty containers after marked 'empty' (part of the closure)

Charlie

8 crews out to perform haz. Eval.

- Tying up the oil spill that they discovered coming from a local producer that had a gun barrel (210 barrel capacity)
 - o Oil water separator out at a production site
 - o OSSO to dealt with oil spill

1 of the teams for tomorrow will go out and perform water evaluations

20 trailers to be brought into Beaumont for housing tomorrow

REOC

Field bullets are due to SITL at 1 pm

Evening numbers are due by 9 pm

Need more pictures!

PIAT out taking photos as well (attempting to include 1 photo in each update)

Debris Team Task Force has been set up

- TCEQ now has 2 people
- Hurricane Florida – debris contractors may move up that way, but possible tasking in the future
- Where will folks take their water samples?
 - o A&M Extension stated that they were not setup for sampling
 - o Texas Health Department?
 - They were not in the EOC, but they may not have the capacity to perform the sampling
 - LLHD?

FEMA's interest in Valero?

Superfund sites in Beaumont has been called off!
